

Student Catalog Addendum

This catalog addendum updates and replaces all references to the expected dates for the Electrician Program’s modification to 840 clock hours throughout the 2024-2026 Student Catalog.

Electrician Program

Advanced Training Institute is in the process of replacing its current Electrician Program (720-clock hour version) with an updated 840-clock hour version of the same program that includes one new module: Solar Photovoltaic System Design and Implementation and Installation.

Although this change was originally scheduled to begin for all students starting in September 2024 or later, currently, it has been postponed until further notice.

In the meantime, students who enroll in the 720-clock hour version of the program, who want to take the Solar Photovoltaic System Design and Implementation and Installation module, once it has been approved, will be able to re-enroll for that module, for the cost of that’s module’s additional hours plus books, once they graduate from their program.

Academic Calendar – Electrician 720 Clock Hours

This updated academic calendar replaces the start and graduation date information for students enrolling in the 720-Clock Hour version of the Electrician program in the Student Catalog.

Start Date	Grad Date
2/12/2024	10/17/2024
3/25/2024	11/28/2024
5/6/2024	1/23/2025
6/17/2024	3/6/2025
7/29/2024	4/17/2025
9/9/2024	5/29/2025
10/21/2024	7/10/2025
12/2/2024	8/21/2025
